DEVELOPMENT EXPERIENCE

AltSchool Africa Backend Engineering Diploma—*Backend Engineering student*

October 2024–Present

I enrolled in the AltSchool Africa Backend Engineering Diploma program to solidify and equip myself with the knowledge and skills required to start, switch, and boost my journey into backend development and initiate my transition into full-stack development.

Greenbarter —*Technical Support Engineer/Frontend Engineer*

October 2024–Present

Greenbarter is a fintech product that was an idea birthed by my colleague back in school, and I volunteered to be a part of the building, branding, and development (as Frontend developer and tech support).

NetFlash— *Frontend Developer (Contract)*

April 2024 - May 2024

Netflash is a Swiss company that provides websites and related services to clients in the Swiss landscape. I was contracted to work with designers and developers alike to build websites for clients and provide their hosting and domain related solutions.

CedarWit Technologies—Frontend *Developer*

February 2024– December 2025

I worked at CedarWit, a premium production and branding service, helping clients enhance their brand visibility and impact through tailored user interfaces and engaging digital experiences.

Williams Synergies Limited—Frontend *Developer*

April 2024–May 2024

Hired as a Frontend Engineer at Williams Synergies Limited, I developed seamless user interfaces, translated designs to code, and integrated backend solutions to deliver complete web solutions aligned with company objectives.

Adesther Global Web Services— *Frontend Developer*

November 2023–Present

Onboarded as a frontend engineer at AGW Service Development, I lead the design and implementation of modern frontend solutions to enhance user experience and meet development objectives. I created a
